This is a table, clearly illustrating the changes in the domestic sales of gasoline-powered and new-energy vehicles in China during the first half of 2025. **In this period**, the sales of new-energy cars **increased steadily, from** 0.79million in January **to** 1.12 million in June. By contrast, the sales of gasoline cars **fluctuated around** 1.1 million. **It is particularly noteworthy that** the sales of new-energy vehicles surpassed those of gasoline-powered vehicles in May.

Such statistics, apparently, can be associated with the fierce competition between new-energy vehicles and traditional cars. **Then, what resulted in the phenomenon above? For one thing,** in recent years, China **has been characterized by** its boom and prosperity in economy, **which has enabled** a host of families to possess additional income to purchase gasoline-powered or new-energy cars. **For another, compared with** traditional cars, new-energy vehicles are **much cheaper, more eco-friendly, more efficient** and require **less** maintenance. **Thus**, an increasing number of people have chosen new-energy cars.

To my understanding, China's car manufacturers **are supposed to pay more attention to** the new-energy car market **due to** its huge potential. **Meanwhile, it is advisable for** them **to work out comprehensive strategies to** develop more types of new-energy vehicles, **such as** solar-powered cars. 这是一张表格，清晰展示了 2025 年上半年中国燃油车和新能源汽车国内销量的变化。在此期间，新能源汽车的销量稳步上升，从 1 月的 79 万辆增加到 6 月的 112 万辆。相比之下，燃油车的销量在 110 万辆上下波动。尤其值得注意的是，新能源汽车的销量在 5 月份超过了燃油车。

显然，这样的数据能让人联想到新能源汽车和传统汽车之间的激烈竞争。那么,出现上述现象的原因是什么?一方面，近年来，中国的典型特征在于其经济的繁荣发展，这使得很多家庭有了额外的收入来购买燃油车或新能源汽车。另一方面，与传统汽车相比，新能源汽车更加便宜、环保、高效，需要的保养也更少。因此，越来越多的人选择了新能源汽车。

在我看来，中国的汽车制造商应该更关注新能源汽车市场，因为其潜力巨大。同时，制造商们还应制定综合策略来开发更多种类的新能源汽车，比如太阳能汽车。

2015年和2021年某市居民日常出行选择

【范文】

Given is a column chart, clearly illustrating the striking contrasts in residents' daily transportation choices in a certain city in 2015 and 2021. In contrast to 2015, **the percentages of** people who took the bus and who drove private cars **decreased** in 2021, **from approximately** 51% and 20% **to** 27% and 16% **respectively.** Meanwhile, larger proportions of citizens chose to use online car-hailing or shared bikes, both **increasing from** less than 10% **to** nearly 25%.

Such statistics, apparently, can be associated with the diversity of transportation means in contemporary society. **But what resulted in the phenomenon above? For one thing**, in recent years, China **has been characterized by** the rapid development of science and technology, **which has enabled** a host of companies to develop more types of transportation means. **For another, compared with** previous years, citizens become **richer and more eco-conscious**. **Thus**, many prefer online car-hailing or shared bikes instead of crowded buses.

Therefore, the government **is supposed to** provide citizens with safer, more convenient and cost-effective models of transportation. In addition, **it is of great necessity to work out comprehensive strategies to** enhance public transportation services. (189 words)

所给的是一个柱状图，清晰展示了 2015 年和 2021 年某城市居民日常出行方式选择的显著差异。与 2015 年相比，2021 年乘坐公交车和开私家车的人所占比重明显下降，分别从约 51%和 20%降至 27%和 16%。与此同时，更高比例的市民选择使用网约车或共享单车，二者均从不到 10%上升到近 25%。

显然，这样的数据能让人联想到当今社会交通工具的多样性。但是出现上述现象的原因是什么?一方面，近年来，中国的典型特征在于其科学技术的飞速发展，这使得许多公司开发出了更多类型的交通工具。另一方面，与过去相比，居民变得更加富有，也更具环保意识。因此，很多人更喜欢网约车或共享单车，而不是拥挤的公交车。

所以，政府应该为居民提供更安全、更便捷、性价比更高的出行方式。此外，很有必要制定综合策略来提升公共交通服务。

显然，这样的数据能让人联想到年轻人不同的生活方式。那么出现这种现象的原因是什么?一方面，近年来，中国的典型特征在于其移动支付技术的蓬勃发展，这使得许多年轻人可以用智能手机买到包括食物在内的各种商品。另一方面，与过去相比，年轻人承受着更大的竞争压力，生活也更忙碌。因此，他们没有那么多的时间和精力去餐馆或在家做饭。

Meanwhile, the right line chart displays that **the percentage of** those aged 60 and above **ascended sharply, from** 10.97% **to** 22%.

显然，这样的数据能让人联想到中国人口的老龄化趋势。那出现上述现象的原因是什么?一方面，近年来，中国的典型特征在于经济的繁荣发展，这使得越来越多的人有了额外收入，来享受更高品质的生活，并且更加长寿。另一方面，与过去相比，如今的年轻人因为各种原因愈发不愿意结婚和生育，因此老年人口比例持续攀升。

简而言之，我认为政府应该更加关注人口老龄化带来的挑战，如劳动力短缺问题。此外，他们应该制定综合策略来鼓励更多年轻人生育。

某大学图书馆图书借阅情况

【范文】

Given is a table, which clearly illustrates the striking contrasts in the circulation of books in the library at a certain university. **Overall**, the circulation of popular fiction **ranks first**, **accounting for** 65.9%. **The next is** non-fiction, **at** 18.2%. **Finally come** books on science and technology and books on literature and art, **at** 10.8% **and** 5.1% **respectively.**

Such statistics, apparently, can be associated with college students' various reading preferences. **Then, what resulted in the phenomenon above? 所给的是一个表格，清晰展示了某大学图书馆图书借阅量方面的显著差异。总的来说，流行小说的借阅量排在第一位，占 65.9%。其次是非虚构类图书，占 18.2%。最后是科技类图书和文学与艺术类图书，分别占 10.8%和 5.1%。

显然，这样的数据能让人联想到高校学生不同的阅读偏好。但是出现这种现象的原因是什么?一方面，大学生的典型特征在于他们有许多作业并且承受着很大的心理压力，这促使他们阅读奇幻小说来减轻压力，因为流行小说既有趣还能振奋人心另一方面，与其他书相比，科技类图书和文学与艺术类图书往往内容专业、无聊，且难以理解。因此，这些书籍主要由相关专业的学生借阅。

作为一名年轻人，我坚信我们应该在业余时间阅读各种各样的书籍，无论是为了学业还是为了放松。阅读是一种良好的习惯，能带给我们新的见解和丰富的知识，激发我们对学习的热情，并帮助我们开阔眼界。

Such a scenario and the statistics above, apparently, can be associated with the increasing popularity of traditional opera among the young. In addition, **compared to** the past years, **more** primary and middle schools offer students elective courses, **such as** music, painting, Wushu, and traditional opera, which arouse teenagers' interest in traditional art. 显然，上述场景及数据能让人联想到传统戏曲越来越受到年轻人的欢迎。首先，中国的典型特征在于其悠久的历史和多样的传统艺术形式，这是中国戏曲流行的基础。此外，与过去相比，有更多的中小学为学生提供了选修课程，例如音乐、绘画、武术和传统戏曲，激发了青少年对传统艺术的兴趣。再者，正是现代科技使越来越多的年轻人能轻松接触到戏曲表演，于是他们中的一些人喜欢上了传统戏曲。

显然，上述场景及数据能让人联想到现实中电子书越来越受年轻人欢迎。那么，出现这些变化的原因是什么?一方面，电子书的特点是更方便、便宜且环保，这使得越来越多的大学生选择电子书作为他们的信息来源。另一方面，尽管电子阅读越来越流行，传统的纸质书仍然受到某些读者的青睐。

作为一名正在准备考研的大四学生，我更喜欢阅读纸质书，它们能给我带来一种沉浸感，激发我对学习的热情，并帮助我更加专注地学习。当然，我偶尔也会阅读电子书。

科技改变习惯

【范文】

These are two simple but satirical drawings. In the left picture, **there is** a girl, **sitting** in front of a computer and **typing** so many words with no difficulty. However, in the right cartoon, without the help of modern technology, the girl has great trouble in writing words on paper, with the thought in her mind: I need to look them up on my cell phone. Finally, **several Chinese characters can be noticed below the pictures, which read that** science and technology has changed people's habits.

The fast development of science and technology, **to my understanding, can be likened to** a double-edged sword. On the one hand, numerous innovative technological products **can bring us** great convenience, **inspire our passion for** a promising life, **and help us** enhance work efficiency. On the other hand, **it is** modern technology **that causes** a number of youngsters **to** lose certain basic skills in life, work, and study. This phenomenon **is particularly worth attention.**

As a college student, **I deem that it is advisable for** us **to** utilize modern technological products, but **it is of no necessity to** be slaves to IT products. (188 words)

这是两幅简单但具有讽刺性的漫画。在左图中，有一个女孩坐在电脑前很轻松地打了很多字然而，在右图中，没有了现代技术的帮助，这个女孩在纸上写字很困难，心里想着:我需要用手机查一下。最后，我们能注意到图画下方有几个汉字，写的是“科技改变习惯”

在我看来，科学技术的飞速发展可以比作一把双刃剑。一方面，众多的创新科技产品能给我们带来巨大的便利，激发我们对美好生活的热情，并帮助我们提高工作效率。另一方面，正是现代科技使一些年轻人丧失了生活、工作和学习中的某些基本技能。这一现象非常值得关注。

作为一名大学生，我认为我们应该使用现代科技产品，但没必要完全依赖 IT 产品。

冲刺背诵 10：材料作文：奖励式教育（新大纲）

Directions: Read the following excerpt from an article and write an essay. In your essay, you should explain whether or to what extent you agree with the author. Support your argument with reasons and relevant examples.

Write your answer in about 150 words on the **ANSWER SHEET**. (15 points)

Many parents look for some sort of reward system that might help improve their children's behaviors at home. While this incentive-based parenting can be a quick fix, research clearly indicates that it can become a problem over time. One problem is that children often do not develop an internal motivation needed to maintain behaviors when the reward is not being offered. For example, if you reward your children every time they receive an "A" on a test, their desire to learn will depend on whether there is a prize. As a result, it becomes very difficult for them to develop interest in learning itself, and the internal motivation to learn.

【范文】

This is a simple but enlightening excerpt of an article, in which the author argues that incentive-based parenting can be effective at home for the short term, but will become a problem in the long run. **Although** I have no children, I couldn't agree more with it.

To my understanding, one's internal motivation **can be likened to** the key to success. **A case in point is** myself. **As** a senior who is preparing for the national entrance exams for postgraduate studies, **I cling to the idea that it is** inner motivation **that enables** me **to** work hard each day, and accumulate adequate knowledge and competence to achieve my dream. **However, in reality, a host of short-sighted parents** may merely rely on the so-called reward system to encourage their children. This phenomenon **is particularly worth attention for the reason that** children often fail to maintain positive behaviors if the reward is unavailable. That is to say, in the long term, this sort of reward system **may constitute an obstacle that hinders** youngsters' growth and progress.

Accordingly, **all parents should bear in mind that** internal motivation cultivates interest in learning itself. If parents intend to see children's sustainable growth, **it is advisable for** them **to** inspire the young's internal motivation. (208 words)

这是一段简单但具有启发性的文章节选，作者在文中指出，短期来看，这种奖励式教育在家里是有效的，但从长远来看会引发问题。虽然我没有孩子，但我完全同意。

在我看来，一个人的内在动力可以比作通往成功的钥匙。一个典型的例子就是我自己。作为一名正在准备考研的大四学生，我坚信，正是内在动力让我可以每天刻苦学习，积累足够的知识和能力来实现梦想。然而，在现实生活中，许多目光短浅的父母可能只依靠所谓的奖励机制来鼓励孩子。这种现象特别值得关注，因为如果没有奖励，孩子们往往无法保持积极的行为。也就是说，从长远来看，这种奖励机制可能会构成一种障碍，阻碍年轻人的成长和进步。

因此，所有家长都应牢记，内在动力培养了对学习本身的兴趣。如果父母想看到孩子不断成长就应该激发孩子的内在动力。
